Preserve and share your work in Academic Commons

Current Columbia University faculty, staff and students are invited to deposit their scholarly work and research materials into Academic Commons, Columbia's online repository. The repository benefits the University and the global research community by:

- Providing a central gateway into Columbia's diverse scholarship, including theses and dissertations.
- Enhancing the visibility of deposited work via Google Scholar and discipline-based portals.
- Helping researchers comply with requirements to archive grant results such as data, software, papers, or learning objects.
- Enabling long-term storage and preservation for a variety of digital file types.

Benefits to deposit include:

- A permanent URL (online address) for materials.
- The ability to feed content to other sites and people online via RSS and other new media tools (e.g., Twitter).
- Support for ensuring appropriate copyright and permissions on content.
- Wide dissemination of work, yielding more citations and more impact on future research.

Deposit your digital materials:

Articles
Conference papers
Datasets
Dissertations
Grant reports
Images & video
Journals
Monographs
Multimedia content
Presentations
Pre- and post-prints
Strategic plans
Technical reports
Theses
Working papers
...and more
